

LET RISQ GROUP  
DELIVER TO YOU THE  
'WHOLE PICTURE'

RISQ Group is one of the region's leading risk management providers, specialising in a range of solutions designed to assist organisations in both the public and private sectors in meeting their governance, risk and compliance needs. Our knowledge and expertise can help your organisation make informed decisions and manage your risk environment in a cost-effective and practical way.

Our range of risk mitigation solutions include:

## EMPLOYMENT SCREENING

Our employment screening programs are easily tailored to meet your needs and help you mitigate the risks associated with hiring employees, contractors or other persons into your organisation. We currently manage some of the largest screening programs in Asia, making us a market leader in the region. Our local footprint, along with our global insight, ensures that you get the most appropriate screening solution for your business, whether it be local, regional or a global enterprise.

## RISK ADVISORY

Many organisations are unaware of the risks inherent in their business, particularly those that are posed by fraud and corruption. RISQ Group's suite of solutions are designed to allow you to gain an understanding of your organisation's risk environment and implement programs designed to mitigate those risks in a cost-effective manner. Our tailored risk management solutions, anti-money laundering initiatives, fraud and corruption mitigation programmes and governance, risk and compliance tools provide you with a solid foundation to understand and address your risk environment.

## INVESTIGATIONS & FORENSICS

When fraudulent, corrupt or unethical behaviour impacts your business, our Investigations and Forensics team will conduct a professional investigation that can limit the damage caused by an incident, provide fast and effective resolutions and recommendations to reduce the chance of recurrence. This same rigour can be applied when investigating matters of bullying, harassment, breaches of policy, and regulatory or legal breaches.

## WHISTLEBLOWER HOTLINE

RISQ Group has been providing hotline solutions to clients in the Asia region since 2004. To meet growing demand, in 2011 we partnered with Navex Global to offer a more sophisticated and robust hotline service. This operates 24 hours a day, 365 days a year, and allows you to meet your compliance program needs and protect the reputation of your business. Together, we offer a "best in class" end-to-end hotline, case management and investigations solution to clients throughout the region.

## BUSINESS CONTINUITY

RISQ Group's Business Continuity Management (BCM) product R2C provides your organisation with the tools you need to respond effectively to a crisis, whilst ensuring business as usual. Many business continuity plans don't accommodate for the realities your business may face in a crisis. R2C has been designed to afford your business structure, discipline and agility by providing a flexible, scalable solution that recognises that each business has different BCM needs.

In a highly regulated and connected world the implications of poor risk management have never been more serious or more immediate.

LET RISQ GROUP DELIVER TO YOU THE 'WHOLE PICTURE'

Our commitment to represent the markets in which we serve is demonstrated by our regional presence.

## SECURITY VETTING

RISQ Group is a member of the Industry Vetting Panel appointed by the Australian Government Security Vetting Agency (AGSVA) to conduct the security clearance process. We are a trusted provider of vetting services and our staff includes former government vetting officers with significant vetting and security experience.

## TRAINING & E-LEARNING

RISQ Group offers a variety of cost effective training, designed to provide your team with interactive and engaging courses across a variety of compliance and risk areas. Our training courses can be delivered online or as a face to face training session. Our trainers will work with you to ascertain your business needs and provide recommendations for the most appropriate method of delivery.

Let us help you understand your risks.
